# 2026 Notification by the ACPR regarding BNP Paribas's classification as a G-SIB

**PRESS RELEASE**

Paris, 25 November 2026

**BNP Paribas has received notification from the *Autorité de Contrôle Prudentiel et de Résolution* (ACPR) that the Group has been maintained on the list of Global Systemically Important Banks (G-SIBs), based on data as at 31 December 2025.**

BNP Paribas has been classified in bucket 3, corresponding to a G-SIB buffer requirement of 2% of total risk-weighted assets applicable from 1 January 2028.

The Group has also been maintained on the list of Other Systemically Important Institutions (O-SIIs). Its O-SII[1] buffer will amount to 1.75% from 1 January 2027 and 2% from 1 January 2028.

When both the G-SIB and O-SII buffers apply, only the higher requirement is applicable.

As a result, assuming that the leverage ratio Pillar 2 requirement (P2R-LR) remains unchanged and that the classification is maintained in 2027, BNP Paribas' overall leverage ratio requirement would increase from 3.85% to 4.10% from 1 January 2028.

**The Group is well above its regulatory requirements. As at 30 September 2026, BNP Paribas reported a CET1 ratio of 12.91%, a Tier 1 capital ratio of 15.59%, a Total Capital ratio of 17.75% and a leverage ratio of 4.44%.**
