Group level information, senior unsecured ratings and covered bond issuer overvi

1.2 Ratings of the parent company of the group in which the CB issuer is consolidated

1.3 Covered bond issuer ratings

The rating agencies' methodologies ususally take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds However, instead of refering to the parent company rating, some rating agencies may issue a "covered t issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecure basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's attent company although it may be different in some specific cases. If no "CB issuer rating" has been granted to the CB issuer, "NA" should be indicated

2.1 Covered bond issue

2.2 Covered bonds and cover pool

<u>Guaranteed loans or mortgage promissory notes</u>: If the eligible assets are transfered into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans

Asset backed securities : If eligible asset backed securities are included in the cover pool, the explanations to the reporting should specify whether the information is provided using a look through approach (i.e. underlying assets or if the outstanding amount of ABS securities held is indicated

"Of which eligible to central bank repo-operations" : The outstanding amount of eligible assets including replacement assets shall be filled in If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans The eligibility criteria to central bank repo-operations include the exceptional measures accepted by the in February 2012 and presently in use with the Banque de France

2.3 Overcollateralisation ratios

Each issuer shall explain calculation methodology for each OC ratio

formulas

- all amounts shall be indicated after taking into account the cover pool's interest rate or currency swaps - accrued interest included or excluded ?

The legislation requires that the calculation of the legal coverage ratio be audited semi-annually within a period of three months following the calculation date. As a consequence, the curren ratio is provisionnal / unaudited when the report is published. The last audited ratio is provided as an additional information.

Rating agencies : Minimum OC

Issuers shall disclose the highest minimum OC requirement.

З ALM

<u>Contractual maturities :</u> Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets For pass through ABS, this assumption is applied to the underlying assets to determine the contractua maturity of the ABS (i.e. contractual maturity is not calculated according to the legal final maturity of the securities).

Expected maturities : The assumptions underlying the calculation of the expected WAL and expected maturity breakdowr Some information should be provided to explain the prepayment assumptions on assets and liabilities For substitute assets, it should be explained if these assumptions include asset sales or repo

3.5 Liquid assets

Outstanding The nominal value of liquid assets shall be reported.

Liquidity support Provide details on the nature of liquidity support.

3.6

Substitution assets Details of the information provided shall be given in the case of split ratings.

Residential cover pool data

- 4 Explain for each table which information is included or not included (e.g. external RMBS assets excluded
- The assets backing guaranteed loans (collateral directive framework), mortgage promissory notes and internal ABS shall be disclosed using a look through approach in each table

4.2, 4.3 Geographical distribution / regional breakdown

The geographical breakdown of assets shall take into account the location of the pledged property for residential mortgages and the location of the property which is refinanced by the loan in the case of guaranteed loans. List can be extended by individual issuers where applicable

4.4 Unindexed current LTV Unindexed LTV is calculated on the basis of the current outstanding amount of the loans and the initia valuation / price of the residential assets.

4.5 Indexed current LTV

Indexed LTV is calculated on the basis of the current outstanding amount of the loans to the appraisec values or prices of the residential assets using an indexation methodology. Details of the indexation methodology shall be provided.

4.6

Mortgages and guarantees Provide a breakdown by guarantee regime in the case of state guarantees

4.10 Interest rate type

"Floating" includes loans with with interest rate reset periods exceeding one year (e.g. loan indexed on CMS SY with an interest rate reset every five very

"Mixed" shall be used for loans with a combination of fixed, capped or floating periods (e.g. 10 years initi fixed rate switching to floating).
