Rules of the Conditional Five-Year Long-Term Incentive Plan (LTIP) granted to Corporate Officers in FY 2021

- **Reminder:** as soon as April 2011, the Board of Directors established a long-term (five-year) fully conditional compensation plan, in order to align the interests of Executive Corporate Officers with the medium- to long-term performance of the BNP Paribas Group.

- Initial amount equal to the target annual variable compensation in respect of 2021, split into 2 equal parts.

- **One assessed on the evolution of the share price in absolute terms**
  - No payment would be made if the share price has not increased by at least 5% over the 5 year period.
  - If this condition is met, a factor is applied to the initial amount, varying less than proportionally with the share price increase.
  - Full payment of the initial award only if the share price has increased by at least 20%.
    - Maximum: 175%

- **The other half in relative terms, measuring the over-performance of the share as compared to the EURO STOXX Banks index**
  - No payment is made if the share just follows the evolution of the benchmark.
  - Full payment of this 50% portion only if an over-performance of at least 10% is observed.
    - Maximum: cap at the initial award.

- The amounts granted are valued in accounting terms by an outside firm. In 2022, it was thus valued at 43,58% of the target annual variable compensation granted in respect of 2021.

- Payment conditional to the presence in the Group during the five years of the plan (except retirement).

- In case of inappropriate behaviour: malus, and clawback over 5 years.

No payment linked to the LTIP can exceed 137.5% of the initial awarded amount.

Principles of Variable Remuneration of “Group MRT*"

These principles are established and proposed by Group Human Resources in cooperation with the relevant business units, presented for approval to the "Compliance, Risks, Finance" Group Committee, then decided upon by senior management after review by the Compensation Committee and approval by the Board of Directors. Every year:

- procedures are audited and checked *a posteriori* by the Inspectorate General, whose report is submitted to the Compensation Committee and addressed to the Regulator;
- the ECB reviews the principles and the implementation of the Group's compensation policy

Since 2014, the Shareholders’ Meeting is presented with some provisions on the MRT remuneration package

The overall variable remuneration of market professionals takes into account, for each business unit concerned, all the components of profits and risk:

- direct revenues, and direct and indirect costs allocated to the business unit;
- internal cost of refinancing (including the real cost of liquidity);
- risk provisioning;
- cost of capital allocated to the entity

**No guaranteed bonus, except in a recruitment context**

- limited to one year, and paid in the same conditions as the "non-guaranteed" remuneration (in particular with a deferred part, subject to indexation and eventually performance criteria)

**No guarantee of compensation for premature termination**

**Ban on hedging and insurance linked to the fluctuation of the share or the profitability of the businesses**
