Rules for Determining the Annual Variable Remuneration for 2020 (1/2)

The target variable compensation (as a % of fixed remuneration) is set at:

- 100% for Jean-Laurent Bonnafé and Philippe Bordenave
  - Reminder: Jean Lemierre, Chairman, receives neither annual nor multi-annual variable compensation, i.e. only a fixed remuneration

Malus and claw-back in case of inappropriate behavior

60% of the variable compensation awarded is deferred over 5 years + 1 additional retention year

Half of the non-deferred portion is paid in May 2021, subject to the approval by the AGM

- the other half being postponed for 1 year from the date of the award (until March 2022) and indexed to the share price

The deferred amounts will be:

- Spread in fifths, from 2022 to 2027
- Indexed for half of their total to the share price since the date of the award
  - each payment will thus be made half in March every year, then half in March the following year, indexed to the performance of the BNP Paribas share
  - the last payment of the award for 2020 will be made in March 2027
- Subject to a performance condition: pre-tax RoE of the Group for FY preceding the payment > 5%

The Board makes sure that the amount of the variable remuneration is consistent with the Group’s results evolution

The annual variable compensation cannot exceed 120% of the fixed remuneration

[Corporate Governance - March/April 2021]
Qualitative Criteria and Their Assessment for 2020

The Board of Directors considers essential to carry out a qualitative evaluation, in particular given the strengthening of its responsibilities in terms of monitoring and oversight stemming from the Monetary and Financial Code

- Beyond the strategy of the Bank that it has to approve, the Board must form an opinion on the performance of Corporate Officers taking into account the capacities of foresight, decision-making, leadership skills and exemplarity

Qualitative criteria considered as implemented

- Jean-Laurent Bonnafé: among others
  - resilient operating results in 2020 marked by a contained increase in the cost of risk, the achievement of the cost savings provided for in the 2017-2020 strategic plan and the increase in the CET1 ratio over the year;
  - his decisive action in the management of the Bank during the Covid-19 crisis with (i) the continuity of the Bank’s services (ii) his key role vis-à-vis large clients (iii) the adaptation of conditions of work for employees;
  - his commitment to make the Bank a leader recognized for its CSR strategy;
  - his personal commitment to the feminization of governing bodies with the definition of objectives for the promotion of women in the medium term;

- Philippe Bordenave: among others
  - resilient operational results in 2020 with, in particular, his involvement in achieving the cost control objectives defined in the 2017-2020 strategic plan and his role in the management of the Bank's balance sheet and liquidity;
  - his involvement in the improvement and sustainable transformation of the Group's information systems to ensure the continuity of BNP Paribas services during the health crisis;
  - his role in the operational integration of Deutsche Bank's prime brokerage activities according to the agreed terms;
  - the monitoring of the implementation of the commitments of the Group's CSR policy;
  - his personal involvement in the reviews requested by the SSM (Single Supervisory Mechanism, ECB) teams in connection with the health crisis

Compensation should not entirely be formula based
Qualitative factors are essential to achieve sustainability

Rules of the Conditional Five-Year Long-Term Incentive Plan (LTIP) granted to Corporate Officers in FY 2020

Reminder: as soon as April 2011, the Board of Directors established a long-term (five-year) fully conditional compensation plan, in order to align the interests of Executive Corporate Officers with the medium- to long-term performance of the BNP Paribas Group.

- Initial amount equal to the target annual variable compensation in respect of 2020, split into 2 equal parts.

- One assessed on the evolution of the share price in absolute terms
  - No payment would be made if the share price has not increased by at least 5% over the 5 year period.
  - If this condition is met, a factor is applied to the initial amount, varying less than proportionally with the share price increase.
  - Full payment of the initial award only if the share price has increased by at least 20%.
    - Maximum: 175%

- The other half in relative terms, measuring the over-performance of the share as compared to the EURO STOXX Banks index
  - No payment is made if the share just follows the evolution of the benchmark.
  - Full payment of this 50% portion only if an over-performance of at least 10% is observed.
    - Maximum: cap at the initial award.

- The amounts granted are valued in accounting terms by an outside firm. In 2021, it was thus valued at 41.59% of the target annual variable compensation granted in respect of 2020.

- Payment conditional to the presence in the Group during the five years of the plan (except retirement).

- In case of inappropriate behaviour: malus, and clawback over 5 years.

No payment linked to the LTIP can exceed 137.5% of the initial awarded amount.
